

Contact your doctor's office if you experience any of the following:

- **Fever over 102°**
- **Round the clock nausea/vomiting, not keeping fluids down for over 24 hours**
- **Excessive and/or discolored drainage from the incision**
- **Swelling or pain in the calf or leg**
- **Hot to the touch or red incision**

Call 911 if:

- **You have difficulty breathing**
- **You have chest pain**

Leg Bandage

The dressing over your incision should be changed on the 3rd day after surgery. You may re-bandage if your incision is still oozing, and then change daily. You do not need a dressing after day 3 if your incision is dry and you are able to keep it clean.

Infection

Infection can be a complication from having surgery, but education and good hygiene can help protect you. Additional information can be found at Centers for Disease Control and Prevention:
